

Ronel Zapata

Senior Technical Consultant

Senior technical consultant and full-stack developer with 10+ years working on data analytics and business intelligence software solutions delivering impactful, robust and reliable engineering products in the oil and energy field, working in projects with companies of all sizes and shapes. I love getting involved in new challenging projects using cutting edge technologies, getting out of my comfort zone. I hold a degree in Computer Engineering from Universidad de Oriente in Venezuela and several certifications on SQL Server, Azure and .NET development.

CERTIFICATES

Azure Administrator Associate, Jan 2020
Issued by: Microsoft.com

Designing BI solutions, Oct 2016
Issued by: Microsoft.com

Data Management and Analytics, Sep 2016
Issued by: Microsoft.com

SQL Server 2012/2014, Apr 2016
Issued by: Microsoft.com

EDUCATION

BS in Computer Engineering

Universidad de Oriente, Venezuela
Mar 2003 - May 2009

WORK EXPERIENCE

Senior Technical Consultant

OVS Group, LLC

July 2018 - Present

Achievements

- Technically led 2 web projects (1 currently ongoing), building digital solutions that excelled clients' expectations.
- Automated engineering workflows, increasing productivity and delivering results in minutes for some processes that took hours to manually complete.
- Improved company application's core features, accurately identifying and reproducing over 150 issues and helping to get them fixed afterwards.
- Wrote application instruction manuals and source glossary for the solution designed.
- Organized frequent working sessions with the end users to thoroughly explain the solution, user interfaces, dashboards, and web pages navigation in general.
- Mentored up to 10 peer developers in HTML/CSS/JS/Kendo/.NET latest coding techniques and best practices to write codes more efficiently.
- Managed project timelines and requirements to meet deadlines and keeping scopes in check using Jira and Agile methodology.

OVS Engineering Solutions Consultant

OVS Group de México

June 2011 - July 2018

Achievements

- Earned 10 SQL Server and 4 .NET certifications in my roadmap learning coding best practices and techniques that helped me in my day-to-day coding.
- Created reports, dashboards and KPIs using HTML/CSS techniques at the front-end and ADO.NET integrations from the back end.
- Developed automated workflows using computationally intensive ETLs.
- Refactored and optimized already implemented workflows and modules helping me to have a better perspective when coding.
- Assisted in company proprietary application internal code optimization solving internal issues and enhancing implemented methods/classes.
- Performed backup, upgrade and restore databases to different SQL Server versions (from 2005 up to 2016) when needed/requested.
- Collaborated with senior engineers to mentor interns.
